

simpull®

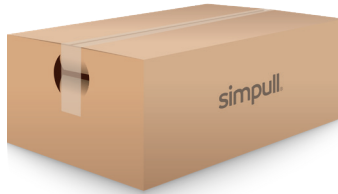

the quick open box

No knives. No damage. No delays.

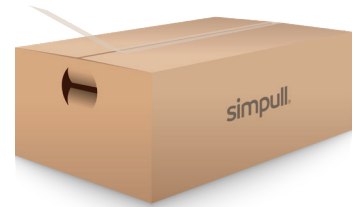

1

Seal box with tape

2

Push in the flaps

3

Grip tape and pull open

Innovation

The Simpull opening system is an engineered formation of perforations that allows a taped up box to be opened with just one hand. By eliminating the need for a knife, the Simpull box:

Save time and money

Allows instant access to contents to save time and money

No product wastage

Makes accidental damage to the contents near impossible

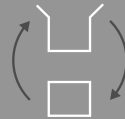

No knife injuries

Removes the risk and cost of injury of the user

Performance

The Simpull opening system efficiently separates the tape from the cardboard in one clean move without damage. Combined with its independently tested structural integrity, the Simpull box:

Extended reusability

Significantly extends the reusable life of the box

Better recyclability

Improves recyclability to help meet sustainability requirements

Safe and strong

Delivers its contents as safe and secure as a traditional box

Tailored to your needs

The Simpull opening system can apply to almost any size box and is unobtrusive to the printed surface. It is remarkably simple to implement into existing production lines and can help you meet your sustainable packaging regulatory obligations.
